techniques like case studies, interviews, observation method, life histories and household census method. **DISCUSSION AND RESULTS:** The study was made among 150 labour families out of which number of male is 445 and number of female is 419. Working hours including the rest period is 8 hours for the labourers.

Understanding the Economic Lives: The Case of Tea Garden

Child labour as a result of poverty. Child labour as a result of poverty is one of the most common theories about the causes behind underage work. A majority of studies in developing countries show that poor families put their children in child labour more often than families in a better economic situation.
